

Announcement no 2/24/SMS/2024/2025
„Erasmus – Mobility for Studies” (KA131/2024)

Interrail Global Pass for Erasmus+ participants

ESN (Erasmus Student Network) has established cooperation with Eurail resulting in creation of a **special pass for rail travel designed for Erasmus+ programme participants: *Interrail Global Pass for Erasmus+ participants***. This is a solution that promotes a more ecological alternative for students and university employees embarking on mobility (the preliminary report from the 15th edition of ESNsurvey shows that 73% of Erasmus+ program participants travel to/from the mobility destination by plane). This initiative reflects one of the Erasmus+ 2021-2027 programme initiatives, namely: *Environment and fight against climate change*.

Thanks to the *Interrail Global Pass for Erasmus+ participants*, Erasmus students can **reach their destination and return home after completing their mobility by train**, reducing their carbon footprint and discovering Europe's most important tourist attractions along the way. Participants can purchase a pass for **4 days in 6 months** or **6 days in 6 months**. Tickets are available in two age categories: Youth (12-27 years) and Adult (28+).

The ESN initiative refers to the mandatory co-financing of travel costs and additional support for travel carried out by low-emission means of transport introduced by the EC in the "Erasmus+ Program Guide" for 2024. **We would like to remind you that trips up to 499 km should be made using the green travel option.**

More information about the Interrail Global Pass for Erasmus+ participants is available at: <https://www.interrail.eu/en/interrail-passes/erasmus> and <https://esn.org/news/eurail-and-esn-launch-erasmus-interrail-global-pass>.

The lump sum rates for co-financing travel costs for Erasmus+ students at the University of Warsaw in 2024/25 can be found in the *General terms and conditions - Selection of students and doctoral students for mobility for studies (SMS)*, art. **36 and 37** http://bwz.uw.edu.pl/wp-content/uploads/sites/358/2024/02/Ogolne-zasady-kwalifikacji_2024_25_SMS_ANG.pdf

We also encourage you to read the materials prepared as part of the Green Erasmus project ([Green Erasmus Project](#)) implemented by a consortium including, among others: ESN and ESU.
